

**BGE v's Grill Dome Kamado,  
in simple layman's terms: BGE built on price, Grill  
Dome built on quality and efficiency.**

Cacky dimply green colour, Yuk!

- Cheap steel vent lid, non attached to cooker, can fall off
- Lower height dome, less cooking capacity for big roasts, 1
- Poor Quality lid hinge, cumbersome and heavy to lift
- Cheap steel bands, will rust away over time.
- Cheap timber handle, won't last long in the elements.
- Very thin stainless vent
- Cumbersome steel trolley, we chose not to supply these as the cooker can easily tip over
- Much thinner ceramic wall thickness, less heat retention, means higher running costs for energy and less moisture

- Attractive alloy vent lid, attaches to cooker.
- Attractive range of colours available
- Higher dome lid, more capacity
- Durable attractive Bakelite handle
- Thick high quality stainless steel bands and components that wont rust away, like black steel
- Much thicker ceramic wall s, means better efficiency, cheaper running costs, more moisture retention in your food.
- High Quality hand construction, with a superior warranty.
- Precision designed thick gauge stainless steel hinge for easy lifting, and tight lid/base seals for better efficiency
