

Kamado Cooker Cast Iron Grill Plate

Excellent quality thick heavy not brittle cast griddle plate perfect for grilled steaks, chicken, especially if you want that wide 'char line' effect on your meat.

Because of the grid widths they retain a lot of heat and really give you that 'lined' effect on your meat.

They are very easy to clean and actually come in 1/4's that sit in the 18.5" frame.

you can remove 1/4 to access charcoal below or replace it with a 'solid griddle plate' perfect for the onions or mushys to go with your steak!

It also comes with its own 'lifter' tool.

Very nice quality and a great griddle upgrade to any Kamado. (18.5" grid size)

\$120 including freight/postage
